AMED60S-GY

DIN Rail

The AMED60S-GY is a whole new step shape DIN rail bracket AC-DC converter series featuring a cost effective, energy efficient solution. These lightweight AC-DC converters have a 90-264VAC input and have an extremely compact design for space saving making them ideal for applications such as industrial control equipment, building automation and numerous applications in harsh environments. Measuring 52.00 x 90.00 x 58.00mm, there are ambient air-cooling vents both at the top and bottom of the converter. The DIN rail is easy to install and remove for maintenance, while efficiently organizing all your electrical cables.

This series offers great operating temperatures, from -20°C to 70°C and features an isolation of 3000VAC for improved reliability and system safety. Furthermore, output short circuit protection (OSCP), overload protection (OLP), and an output overvoltage protection (OVP) come standard with the series.

Features

- Universal Input: 90 - 264VAC/127 - 370VDC
- Operating Temp: -20 °C to +70 °C
- High isolation voltage: 3000VAC
- Low ripple & noise, 240mV(p-p), max.
- Short circuit protection, over-voltage protection, and overload protection.
- Overvoltage category III (OVC III)
