AMESP100-277NZ

Enclosed

The AMESP100-277NZ is an AC/DC converter that offers much greater cost effectiveness due to material normalization and production automation also leading to improved reliability and performance. Offering a commercial input voltage range of 90-305VAC and an output voltage range from 5-48V, this series will offer many benefits to your new system design.

This new series offers great operating temperatures, from -30°C to 50°C with full power also features isolation of 4000VAC for improved reliability and system safety. Furthermore, a high MTBF of 280,000h, output short circuit protection (OSCP), output over-current protection (OCP), output over-voltage protection (OVP) and over-temperature protection (OTP) come standard with the series.

The AMESP100-277NZ is suitable for street lighting controls, grid power, instrumentation, industrial controls, communication, and civil applications.

Features

- Universal Input: 90 - 305VAC/127 - 430VDC
- Operating Temp: -30 °C to +70 °C
- PFC function
- High isolation voltage: Up to 4000VAC
- Low ripple & noise, 250mV(p-p).
- Output short circuit, over-current, over-voltage and over temperature protection
- Regulated Output
- Optional conformal coating
